Sihle Mtshini

Objective: A dedicated and skilled Fullstack software engineer with over [X years] of experience, seeking to leverage expertise in front-end and back-end development to contribute effectively to an established retail software developer. Committed to delivering high-quality code and optimizing user experiences, while adhering to coding standards and fostering a collaborative team environment.

Education:

 Bachelor of Science in Computer Science, [University Name], [Year of Graduation]

Professional Experience:

Fullstack Software Engineer

[Current/Previous Company Name], [Dates of Employment]

- Collaborated with cross-functional teams to develop and maintain robust retail software solutions, ensuring smooth user experiences and system functionality.
- Utilized key programming languages including JavaScript, CSS, HTML, and C#
 .NET Core to build scalable and efficient applications.
- Implemented RESTful API development for seamless data exchange between front-end and back-end systems, utilizing web technologies such as ReactJS and AngularJS.
- Proficient in Docker containerization for continuous integration and continuous deployment (CI/CD) pipelines, ensuring efficient development workflows.
- Designed and developed databases across various platforms including MSSQL, MySQL, and Postgres, proficient in handling JSON and XML data formats to meet business requirements.
- Implemented unit and integration testing frameworks to ensure code reliability and maintainability, following test-driven development practices.
- Conducted regular code reviews and effective debugging sessions to enhance code quality and identify areas for improvement.
- Contributed to the growth and maintenance of the codebase by adhering to coding standards, emphasizing object-oriented programming (OOP) principles.
